COUNTY FAIR NEWS NOTES

The Summit County Fair trustees met this week and arranged an excellent program.

The musical contest will be one of the leading features of the Fair this year. A special invitation is issued to all who sing or play the piano.

The program will consist of choir officials felt like they did not receive the support of the business community. There will be solo and solo for boys and girls under 15 years of age. There will be a Piano solo and a Piano duet. Competent judges will be present and the judges will be awarded after each number. Next week we will report a complete program of all the plans to be used in the contest.

Those wishing to enter will write to J. N. Austin at Coalville. Watch for the entire program next week.

At a meeting of county fair officials and a few representative citizens, held the other evening, it was the unanimous sentiment that all would get busy and boost for the fair. Some of the officials felt like they did not receive the support of the business community. There will be solo and solo for boys and girls under 15 years of age. There will be a Piano solo and a Piano duet. Competent judges will be present and the judges will be awarded after each number. Next week we will report a complete program of all the plans to be used in the contest.

SHALL WE VOTE THE BONDS?

The proposition to bond Coalville City in the sum of \$15,000.00 for a water works system for the **whole of Coalville** is to be submitted to the qualified electors of said city on August 16th, of this year. No doubt all Coalville citizens agree that an adequate water system would be desirable to our beautiful little city. Some assert it is a necessity. But the great question which confronts most of us is: **"CAN WE AFFORD IT UNDER PRESENT CONDITIONS?"**

For the purpose of giving the tax payers accurate information on the expense of the proposition, the writer has examined the assessment rolls and finds the following facts:

The total assessed value of property within Coalville is a little over \$100,000.00. Of this amount the corporations, such as our stores, the railroad and telephone companies, are assessed over \$105,000.00. This ratio means that every time that \$20.00 is paid on the bond issue the corporations shall pay \$17.50 and the people shall pay \$13.00, or in other words, every time a bond of \$100.00 is paid the corporations shall have paid \$100.00 of the amount and the people shall have paid \$60.00, or in the whole bond issue the corporations shall pay \$5,250.00 and the people shall pay \$3,750.00.

The writer will carry the above forward another step, but on a slightly different basis, that each person for himself, may ascertain his individual expense for the system.

There are approximately 160 qualified electors at the coming election. Of these 160 persons forty are assessed with slightly over \$15,000.00 worth of property. Total assessment of property assessed at the corporations make \$120,000.00 worth of property assessed to the forty individuals and the corporations within the city. Deduct this \$20,000.00 from the total assessed valuation of \$100,000.00 and it leaves \$100,000.00 worth of property assessed to the remaining 120 qualified electors.

An examination of the assessment rolls shows that each of those 120 qualified electors is assessed with less than \$100.00 worth of property, in fact only forty of them are assessed with over \$20.00 worth of property, leaving eighty persons assessed with \$20.00 or less, those eighty persons representing one-half of the qualified electors at the coming election.

Now, Mr. Taxpayer, let us get down to cold facts. On an assessed valuation of \$100,000.00, it will require a \$1.25 mill tax per year to pay off the \$10,000.00 bond issue in twenty years.

This means to you, Mr. Taxpayer, an expense of twenty-five cents on each \$100.00 of assessed value of your property, per year. So look up the amount of your tax notice or ascertain what it is from the county clerk, and if you find that you are assessed with \$100.00, the cost to you will be twenty-five cents per year, and if you find that you are assessed with \$200.00, the cost to you will be fifty cents per year, and on a \$100.00 assessment the cost will be \$1.25 per year, and on a \$100.00 assessment the cost will be \$2.50 per year.

From the above facts we ascertain that eighty of the qualified electors at the coming election will pay a tax of \$1.25 or less per year, and that forty additional qualified electors will pay a tax of \$2.50 or less per year.

Mr. Taxpayer, the writer stands ready to verify the above figures. Now, where shall it be? The pump, or a modern waterworks system. A modern waterworks system is cheaper than a pump to at least half the people in the city. The life of a pump is not liable to exceed twenty years. Its original cost is about \$15.00. This means the per year on the original investment. Look up your pump bills and ascertain whether or not you have expended \$1.25 per year in time or money to keep the pump going. If you have this means \$1.25 per year for the maintenance of your pump, or the per year more than half the persons in the town will be required to pay to install a modern waterworks system, as it will only cost \$1.25 per year on an assessed valuation of \$100.00, and eighty of the

qualified electors are paying on that amount of less.

Summit County bound to the time for a new school building. The writer, therefore, would propose to investigate the records, and then will find that interested citizens of Coalville have had the property rights in Coalville since District adjusted and this year within the district there is nearly double property of previous years. This property comes principally to the railroad, that is, lumber for the new school building will not materially increase our taxes.

Otherwise, that the electric lighting plant will be bonded and going before that is still bonded for \$20,000.00, but that it is going behind time. An examination of the records will show that the plant is practically paying its way.

A water works system will not detract the running expense which is entailed in an electric lighting system. The water system burns no coal, it has a machinery to wear out or get bent off, but when once properly installed it has a life of from 20 to 30 years practically without expense.

This is an opportune time for the installation of the system as it will give our citizens employment during these hard times. The purpose is to employ Coalville labor as far as possible.

It appears to the writer that the electors of Coalville can afford a "water works system." It will not burden us, some would have me believe, as the above figures disprove this theory. Information which is accurate on the whole system is received from the Mayor.

Now, Mr. Taxpayer, let us unite on this important proposition and put a waterworks system in our city. We can get no means. The water can run forever home in the city. The system can be completed this fall as the Mayor has pledged himself to commence work the day

the state legislature will be recessed about 20 per cent. The system will give protection to the whole community against fire, and particularly against loss by the man who can not afford to insure. It will place a modern necessity within our reach and take a part of the drudgery out of our homes. It will make the whole city more sanitary and conducive to the general health of the people by giving us fresh pure water, a luxury with which all of Coalville is but abundantly blessed. It will beautify our city as we can sprinkle our lawns, shrubs and flowers and make our homes beautiful.

It will contribute to the welfare of Coalville to make it a more healthy and sanitary, attractive and desired little place.

Respectfully submitted,

P. H. NAVY.

Oldest Almanac.

The oldest almanac in existence is the "Almanach National," which has been issued by the French government since 1684. Its name has been changed a good many times during its career of 225 years. Originally the "Almanach Royal," it became "National" in 1788, "Imperial" in 1806 and reverted to its original name nine years later. Since then the title has been altered four times. Like most publications of this sort, the "Almanach National" has grown bulky with advancing years. The first issue contained 43 pages, as compared with 1,500 pages in the current issue.

Notice.

To the Qualified Electors of Coalville City, Summit County, State of Utah:

Notice is hereby given to the Qualified Electors of Coalville City, Summit County, State of Utah, that on the 1st day of August, A. D. 1912, a Special Election will be held in Coalville City, Utah, to vote upon the proposition to bond Coalville City for the purpose of raising \$15,000.00 to be expended in the establishing of a Water System in said City, said proposed waterworks system to be owned and controlled by Coalville City.

The principal of said bonds to be paid within twenty years from the time of contracting same.

The polls will be opened at County Court House at 7 o'clock a. m. and will close at 5 o'clock p. m. on said 1st day of August, A. D. 1912.
